

# How to delete a page (or hide it for later).

- First, get to the MAIN page (the one that shows up first)
  - You can click your name right after TWS in the links.

Let's say I want to hide "abc" from my links.

- Choose Page Options
- Click Page Status →

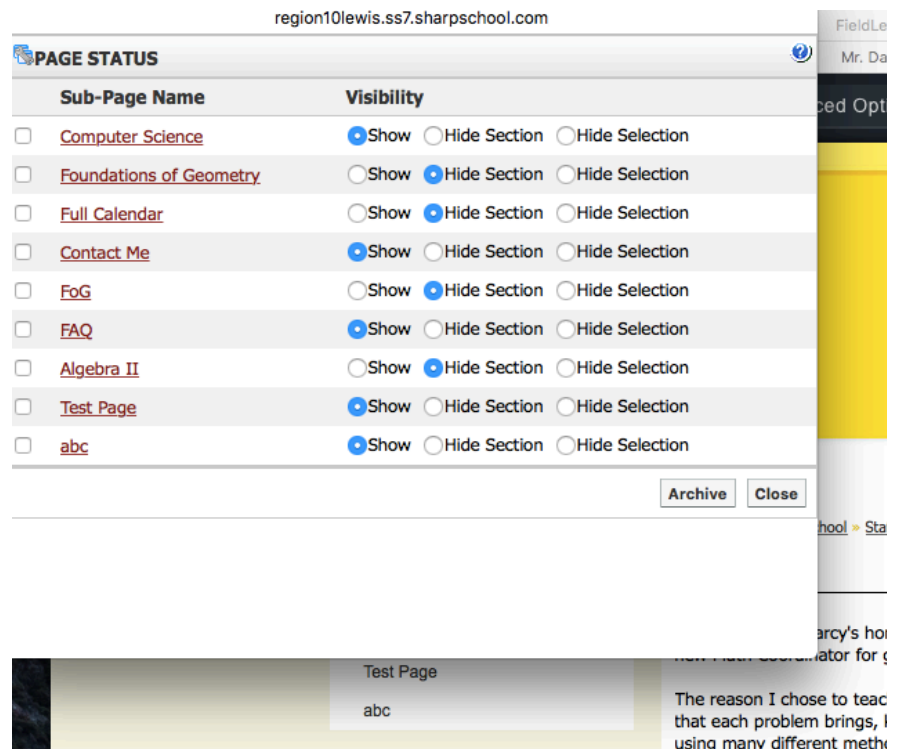

This screen will pop up.

- Select "Hide Section" and it will no longer be visible to the public (unless they know the exact link which is unlikely)
- You DO NOT need to click anything else. Just close.
- Refresh the page to make sure it worked.

To Remove:

- Check off the sub-page name.
- Click **Archive** and close.
- To delete **FOREVER...**
  - Choose Page Options again
  - Click Archived Subpages
  - Choose and Delete Selected.

Done!
