

Instruction

**Career and Vocational Education**

The Board of Education believes that constructive attitudes and concepts involving the dignity of all kinds of work should be woven into existing curriculum, commencing with the beginning grades. Educational programs shall continuously expose students to the nature of the wide variety of careers in the world of work. Occupational education shall take into account technical and economic conditions and changes, and, as a core component of comprehensive education, shall share with other aspects of attitudes as well as skills. Guidance and counseling services shall be provided to each student throughout his or her academic program.

The Board of Education directs the administration to offer a planned, ongoing and systematic program of instruction in career education.
